Atriaux is a leading provider of consulting, design, engineering, architecture, interior design, program management, construction, and technical services. Atriaux is a verified Service-Disabled, Veteran-Owned Small Business by the U.S. Department of Veterans Affairs.

In 2001, two retired US Air Force engineers with 60 years of base, major air command, HQ USAF-level experience, founded Atriaux to bring their considerable experience to both public and private clients.

From our home base in Hickory, NC, our team of 25 professionals quickly built a name for itself as a skilled, rapid response force ready to take on tough architecture, engineering and construction challenges anywhere in the nation or around the world at a moment's notice.

Today, our unique expertise is in demand on-site and in the field at widespread medical centers, military and governmental installations and public and private sector locations. The company has uncommon experience for a small business with projects literally across the continental United States as well as multiple overseas locations.

“ I wish all contractors we worked with were at the same standard as Atriax Group... truly one of the most professional and cooperative groups of people I've worked with in a very long time. We make a great team! ”

*Glenn Easterby
Base Civil Engineer, 628th CES, Joint Base Charleston*
